

Assignment 6

1. Tutorial 7 itself (completed with the class) -- 20 pts.

Tutorial 4

2. Case Problem 2 p.213 -- 50 pts.

Tutorial 6

3. Case Problem 4 p. 367 -- 100 pts.

Total: 170 pts.

Case Problem 2 Notes

1. **TYP0 ALERT!** Page 216, step 18 :

...Declare the contributions namespace using the prefix ~~cont~~ **clist**.

2. In step 13 do not forget to import TWO schemas: lib and clist together with the corresponding namespaces.
3. In step 15 a *reference to the contributions element from the contributions namespace* is:

```
<xs:element ref="clist:contributions" />
```

Case Problem 4 Notes

To make the document look similar to one you see in the book you will need to create and link a style sheet to the resulting HTML document. Please do not worry too much about the appearance of the page, just make sure you got the content displayed correctly.

At the very bottom of the page they have a horizontal rule done with deprecated element `<hr />`.
