

## Extra Credit Assignment 2

Sign your work! Please add a comment with your name to each XML document you submit.

### Tutorial 7

1. Review p. 435 -- 50 pts.
2. Case Problem 1 p. 436 -- 50 pts.

**Read notes below before you begin your work.**

Total: 100 pts.

### Notes on Review:

In step 9 the book wants you to create a template named totalRevenue. You can use (copy/paste) template totalCost from the tutorial 7 to your code and change its name to totalRevenue. Do not forget to change the template name in the recursive call too.

### Notes on Case 1:

Start your work with the file polls.xsl that is zipped and posted in the assignment folder. In steps 8 and 9 you are asked to create a recursive template named showBar. This template is written and commented out in the polls.xsl file. Use it in your work.
