Extra Credit Assignment 1

<u>Sign your work</u>! Please add a comment with your name to each XML document you submit.

1. From Tutorial 1: Case Problem 2 p.42   -- 50 pts.
2. From Tutorial 2: Case Problem 4 p.84   -- 50 pts.
3. From Tutorial 3: Case Problem 3 p.139   -- 50 pts.

Total: 150 pts.

Notes on Case Problem 3:

1. In steps 3 and 6 attributes named *parts* and *model* should be declared to contain a LIST of ID references (#IDREFS)
2. In order to complete step 9 please read the text book and info about #FIXED keyword on the page: http://www.w3schools.com/dtd/dtd_attributes.asp. That page has a good example.
3. After adding p and m prefixes to all the element names in steps 13 and 14 you will notice that documents parts.xml and models.xml became invalid. They lack the namespace definition. Do not add those definitions; just leave these two documents with an error. Your main goal is to make final document, warehouse.xml to validate without any errors.
4. When validating final document (warehouse.xml) you will find some errors. Please fix those.
